

CASE STUDY

STRENGTHENING CYBERSECURITY FOR A FINANCIAL SERVICES COMPANY

CLIENT OVERVIEW

A large financial services firm with over 250 employees, providing wealth management, investment, and advisory services to a diverse client base.

THE PROBLEM

The company faced increasing **cyber threats**, including phishing attacks and ransomware attempts, which placed sensitive client data and daily operations at significant risk. With limited in-house security resources, the firm struggled to provide around-the-clock monitoring and lacked the capacity for rapid incident response. This created vulnerabilities that could impact both compliance and client trust.

THE SOLUTION

The firm partnered with **Agile Pro Solutions (APS)**, a trusted **Managed Security Services Provider (MSSP)**, to implement a comprehensive cybersecurity program. APS provided **24/7 SOC monitoring, firewall management, endpoint security, and an incident response team**, ensuring proactive threat detection and rapid mitigation.

SERVICES PROVIDED

- **24/7 Security Operations Center (SOC)** – Continuous monitoring for threats.
- **Firewall Management** – Stronger perimeter defense and traffic control..
- **Email & Ransomware Protection** – Advanced filtering and attack prevention.
- **Endpoint Security** – Protection against cyber threats and data breaches.
- **Incident Response Team** – Immediate action to contain and resolve threats.

RESULTS

- **100% reduction in phishing-related incidents** through proactive monitoring.
- **24/7 threat detection and rapid response**, minimizing downtime.
- **Improved compliance** with financial industry security regulations.
- **Increased client trust** through stronger data protection and security assurance.
